STEFAN TRKLJA COUNTRYMAN

Physics Ph.D. Candidate at Columbia University working in Gravitational Wave (GW) Multi-messenger Astrophysics (MMA)

538 West 120th, 730 Pupin Hall, Mail Code 5264 stc.sh in linkedin.com/in/stefancountryman @ stefan.countryman@gmail.com

EXPERIENCE

Physics Ph.D. Student/Graduate Research Assistant Columbia University

September 2014 - Present

New York, NY

- 2019-2022: Developed hpmoc, world's first high-perf. sparse multi-resolution spherical image numeric library, to speed up likelihood calc. in llama (below)
 - $10^4 \times$ real speedup over competing image processing libraries
 - $O(2^N) \to O(N)$ algo complexity drop via array rep. of sparse quad trees
 - Most advanced skymap plotting/algo prototyping tools in field
 - Abstract, documented API massively simplifies training/use
 - Currently pursuing patents based on methods developed
- 2016-2019: Developed 11ama, 1st online search for neutrinos from GW sources
 - Pioneering object-oriented DAG pipeline library for fetching and statistically analyzing heterogeneous observational data streams in low-latency
 - Fastest GW/ ν MMA search pipeline since introduction in 2016
 - Added Bayesian statistical method upgrade for 2019/LIGO O3
 - Most feature-rich, extensible, performant, reliable, reproducible, and mature GW multi-messenger search library to-date
- 2010-2017: Maintained LIGO's timing system, developed and installed systems and tools for its independent diagnostic system, and documented all of it
- Applied detector and software expertise to other group science goals
- 1,000s of hours of teaching, tutoring, & outreach in math & physics

Science and Programming Outreach Consultant World Science Festival

April 2015 - May 2016

New York, NY

- Advised Chairman Prof. Brian Greene on outreach/education tech
- Switched WSU to faster web-first tech stack & made physics demos

Founder

West End Coaching and skilld.co

Mid 2013 - Late 2014

New York, NY

- Founded/operated highly-profitable tutoring company West End Coaching
- Founded on-demand marketplace skilld.co and tested MVP app

SELECTED PUBLICATIONS

Journal Articles

- Countryman, S. et al. (Jan. 2019). "Low-Latency Algorithm for Multi-messenger Astrophysics (LLAMA) with Gravitational-Wave and High-Energy Neutrino Candidates". In: arXiv e-prints. arXiv: 1901.05486 [astro-ph.HE].
- Bartos, I. et al. (Oct. 2018). "Bayesian Multi-Messenger Search Method for Common Sources of Gravitational Waves and High-Energy Neutrinos". In: arXiv e-prints. arXiv: 1810.11467 [astro-ph.HE].

HONORS & AWARDS

lacksquare

Special Breakthrough Prize in Fundamental Physics

For contributions to LIGO's Nobel-prizewinning first detection of gravitational waves, GW150914

P

Gruber Cosmology Prize Also for GW150914

TECHNICAL SKILLS

Python Rust SQL DevOps Web			
JS O	OP Docker	Optimization Git	
System Architecture Bash UNIX TeX			JNIX TeX
Stats	Num. Method	ds HPC	APL C
FPGA	Julia Tech.	lia Tech. Writing Has	
Cloud	MATLAB	lardware	Debug

LANGUAGES

English French Italian Bosnian/Serbian/Croatian

EDUCATION

Ph.D. in Physics (in-progress) Columbia University

🛗 September 2014 - May 2022 (Expected)

Thesis title: Novel Computational Methods for Image Processing and Compression with Application to Multi-Messenger Astrophysics using Gravitational Waves and High Energy Neutrinos

M.Sc. and M.Phil. in Physics

Columbia University

September 2014 - May 2017

B.Sc. in Applied Mathematics Columbia University

September 2009 - October 2013 with English minor
